HAVE YOU SECURED SATISFACTORY SEED CORN?

Note extract from from the U. S. Department of Agriculture, Bureau of Agricultural Economics, circular February 27th, 1924:

"Seed Corn gives evidence of running red clover a close race from a demand standpoint and may even nose out the latter when more farmers in the Corn Belt have tested out their corn and find the germination too low for planting. Futhermore, corn has commanded a relatively better price than other kinds of grain and growers will not be inclined to take chances on planting corn that is unfit for seed."

We offer limited stocks 1922 CROP early maturing varieties as follows, subject being unsold. We carried over these lots of old crop Corn from our contract grown stocks. Recent tests show good, strong vitality. The old Corn will be safer to plant than much of the new crop.

	<u>Sacked</u>	<u>Our 1924 Test</u>	
Pride of North Yellow Dent	2 bu.	96 per cent	\$1.75 per bu.
Golden Glow (Wis. No. 12)	2 bu.	90-95 per cent	1.75 per bu.
Minnesota King	2 1-2 bu.	95 per cent	1.75 per bu.

Also offer the following varieties NEW CROP Seed Corn, very carefully selected and tested as follows, subject being unsold:

	<u>Sacked</u>	<u>Our 1924 Test</u>	
So. Dakota grown Minnesota No. 13	2 1-2 bu.	95 per cent	\$1.75 per bu.
So. Dakota grown Silver King	2 1-2 bu.	94 per cent	1.75 per bu.
Nebraska grown White Cap Y. D.		90 per cent	1.75 per bu.
So. Dakota grown Yellow Dent	2 1-2 bu.	90-95 per cent	1.50 per bu.

f. o. b. Chicago, burlaps extra, prompt shipment

The South Dakota Yellow Dent Corn we are offering is field run, sound stock, moisture content not exceeding 15 1-2 per cent, thoroughly milled and cleaned, and of early maturing strains, suitable for general crop in north central sections, or for ensilage in more northern sections of the Corn Belt.

Special freight paid quotations for assorted cars on request.

Yours very truly,

THE ALBERT DICKINSON CO.

"A Place For Everything"

A place for everything good, and everything good in its place, might well be applied to Red Clover.

Prominent Agricultural Authorities are a unit in advocating an increase in Red Clover acreage. Without the aid of seed from the outside, this would be impossible.

Applied to a large part of the country, the "Native Only" idea has fallen down.

Generally speaking, "Native" is recognized as first choice but in case of shortage, as in the present situation, the right kinds and qualities of "Foreign" have a definite and important place.

We do not handle Italian or South European Clover or Alfalfa Seed
